Our 17 year history assures best practice in privacy, security and the ethical use of data

We all have a responsibility to use data for good

Privacy

- We have built our business based on privacy by design principles for the past 17 years
- Quantum has strict protocols around the receipt and storage of personal information
- All information is de-identified using an irreversible tokenisation process with no ability to re-identify individuals.

Security

- We are ISO27001 certified - internationally recognised for our ability to uphold best practice standards across information security
- We use 'bank grade' security to store and process our data
- Comply with 200+ security requirements from NAB, Woolworths and other data partners
- All partner data is held in separate restricted environments
- All access to partner data is limited to essential staff only
- Security environment and processes regularly audited by our data partners.

Ethical use of data

Applies to all facets of our work, from the initiatives we take on, the information we use and how our solutions impact individuals, organisations and society.

Quantum believes in using data for progress, with great care and responsibility. As such please respect the commercial in confidence nature of this document.

Executive summary

01 Task 1

Older Families (Budget) and Young Singles/Couples (Mainstream) drive the most chip sales. Kettle is the leading brand, and pack size has little effect on purchase decisions.

02 Task 2

A new store layout trial across 3 stores drove real sales increases — up to 74% in one store — confirming the layout is worth expanding.

01

Kettle

Leading brand — ~2x nearest rival

Dec & Mar

Peak sales months

Our customer base skews toward two very different life stages

Older Families (Budget) spend more often, while Young Singles/Couples (Mainstream) form a much larger customer base – two different paths to the same top-tier sales.

Mainstream shoppers dominate our customer base across every life stage.

02

Trial store performance

To measure the new layout fairly, each trial store was compared to a similar store that didn't change — so we could tell the difference between the new layout and normal month-to-month ups and downs.

All three trial stores saw a real, measurable sales increase

Store 77: Sales grew steadily through the trial, up 74% by the final month — the strongest and most sustained result

Store 86: A strong spike mid-trial (+26%), though it eased off by the end

Store 88: An early boost (+7% to +17%) that gradually faded as the trial went on

The layout change is working — the next step is deciding where and how quickly to roll it out further.

Thank you
